Call for Participation in FEC6 student workshop

Fed4FIRE+ (https://www.fed4fire.eu/) is a flagship European Research Project and offers the largest federation worldwide of Next Generation (NGI) testbeds, which provide open, accessible and reliable facilities supporting a wide variety of different research and innovation communities and initiatives in Europe.

The Fed4FIRE+ engineering conferences (FEC) are a series of technical events organized by the project with the aim to strengthen the interaction among the different stakeholders involved. The FECs provide an opportunity for researchers and experimenters to showcase their results, analyze technical requirements from the testbeds and strengthen the community among innovators and facility providers.

The 6th FEC will take place from 15-17 October 2019 in Athens, Greece (https://www.fec6.fed4fire.eu/) and has a special focus on **"Wireless and Mobile clouds and mobile edge computing (MEC)".** On Wednesday 16th of October, a student workshop is organized which aims at giving the opportunity to both the senior undergraduate and graduate (MSc and PhD level) students to learn how to design and execute experiments with Fed4FiRE+ facilities and tools.

The capacity of the workshop is limited to 30 participants.

Registration is FREE, however due to room capacity limitations Reservation is absolutely required.

For registering and/or additional information, the interested students must send email at both **ddechou@netmode.ntua.gr** (Dimitris Dechouniotis, National Technical University of Athens) **and papavass@mail.ntua.gr** (Professor Symeon Papavassiliou, National Technical University of Athens).

Information Required for Registration:
